

Alternate Lightroom Preset Installation Instructions

For Lightroom 4-6 and CC

There is more than one way to install Lightroom presets. The easiest way to load your presets (and get them to 'stick') is to follow these 11 easy steps:

1. Open your zip file.
2. Save the Greater Than Gatsby preset folder in an easy to find location on your computer.
3. Open Lightroom and go to Develop>New Preset Folder in the menu bar.
4. Populate the Folder Name box with the GTG collection name (i.e. **GTG - Sculpted Light**, **GTG – Clean Workflow**, **GTG – Wedding Collection** or **GTG – Innocence Collection**).
5. Click Create .
6. Make sure you **already have an image open in Lightroom**.
7. In the Presets section of the Develop module, click on the folder you just created and then select 'Import' by:
 - PC – Right-clicking on the new folder
 - Mac – Holding the Control Key and clicking on the new folder
8. Navigate to the preset folder location and select all preset (.lrtemplate) files inside the folder.
 - To highlight all files: **Click** the first preset file, hold the **Shift Key** and **Click** the last preset.
9. Click Import
10. Restart Lightroom
11. View your Greater Than Gatsby presets under the Preset section in the Develop module.

Note: Remember to back up your preset folder on an external storage device.
